

VIDEO ENCODERS

A COMPLETE HARDWARE AND SOFTWARE SOLUTION

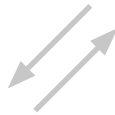

Offering the ultimate in flexibility and performance at an attractive price point.

H.264

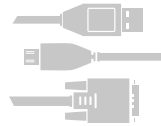

H.264 Encoding

Each of our ZEUS™ encoders and decoders offer High Profile H.264 video in broadcast-quality resolutions.

Versatile Configuration

Leverage twice the capabilities in one system with products featuring both encoding and decoding capabilities.

I/O Combinations

Each product was designed with a variety of input/output options to give users flexibility with their product.

Size Options

From ultra-compact and easily transportable to rack-mount systems, we have a solution for your needs.

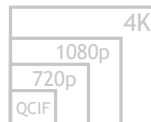

Streaming Formats

Our encoders support essential streaming formats including: RTP, RTMP, RTSP, MPEG-2 TS and others.

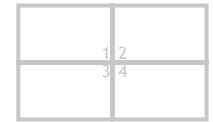

Video Bitrate Ranges

We offer a wide range of video bitrates ranging from <1- 50 Mbps.

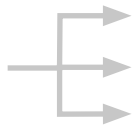

Resolutions

Encode broadcast-quality H.264 video in SD, HD and Ultra HD resolutions with automatic resizing.

Multi-Channel Options

Powerful systems with encoding options ranging from one to four channels in HD resolutions.

Multi-Resolution Encode

Encode one source into multiple resolutions (SD or HD) and bitrates.

Closed Captioning

Many of our encoders feature SD and HD Closed Captioning to meet your video requirements.

Low Power

Our encoders feature low power consumption with options as low as 3W.

Easy-to-Use Controls

Utilize our HTTP-based GUI to customize encode/ decode settings and manage access with password authentication.

Cost Effective

Our ZEUS™ product line was designed to offer high quality encoders and decoders with professional-grade features at an affordable price point.

DOC-MKT-0054-01. Some features may vary by product. Please see product data sheets for detailed information.
